

**Commercial Refurbishment/
Redevelopment over \$5m**
**WINNER: Boulderstone
Hornibrook Pty Ltd**

Judges comments: Boulderstone Hornibrook overcame extraordinary difficulties to successfully achieve the transformation of this former hotel into a luxury apartment building. They implemented innovative solutions in order to successfully deliver an excellent and distinctive product. All finishes are of an exceptionally high standard throughout and Boulderstone Hornibrook is deemed worthy recipients of this award.

Civil Construction
WINNER: Built Environs Pty Ltd

Judges comments: The Snowtown wind farm is typical of other wind farm projects ... with no or limited services available. Crushing plants were established on site to assist with development access and service roads. Built Environs was required to carry out work in extreme conditions. This necessitated concrete pours starting at 4am. The skill in maximising the number of rock anchored footings rather than more orthodox gravity-based footings resulted in significant cost and time savings and minimised the concrete required. The project was completed ahead of its completion date.

Medium Density Development
**WINNER: Boulderstone
Hornibrook Pty Ltd**

Judges comments: This challenging project required a previously functioning hotel to be transformed into luxury apartments. Boulderstone Hornibrook overcame significant challenges and difficulties in order to do so and the end result speaks for itself. The finishes are all of an exceptionally high standard and set a new benchmark for the industry.

Retirement Living
JOINT WINNER: Commercial & General Pty Ltd

Judges comments: Commercial & General achieved a very high standard of internal and external finishes making this an exceptionally comfortable building for the tenants. All of the various stages of development were thoughtfully integrated and the project was extremely well managed. The end result represents extremely good value for money.

Retirement Living
JOINT WINNER: Mossop Group Pty Ltd

Judges comments: Mossop Group was faced with a very difficult site that demanded careful attention to construction methodology and innovative solutions. The Mossop Group rose to the challenge and work was completed to an outstanding level.
